

Exercise Pools

HF Sport

## HF Sport Exercise Pools

HF Sport Exercise Pools, with our very own integrated HF Velocity Swim Jet, are designed to optimise all levels of workout and physical therapy from intense triathlon training through to gentle rehabilitation to help ease aches and pains.

Swimming against a smooth counter-current, you effectively swim on the spot and never reach the end of the pool. They are a perfect choice for people who perhaps do not have the space or budget for a full size pool but want to invest in all the physical and mental benefits that swimming has to offer.

The HF Sport is available in two standard sizes – 5m x 2.5m and 6m x 3m, with depth options

of 1.5m wall (1.35m water) or 1.2m wall (1.05m water) and can be installed in-ground or above-ground. Above-ground pools have an adjustable steel support system which allows the panels to be fixed to a concrete floor, providing a fully self-supported pool which can be situated either indoors or outdoors.

Talk to your pool professional about how a HF Sport could look in your own home.

## Why is a HF Sport exercise pool the CLEVER choice?

# C

### CONVENIENT

Heat Form exercise pools are available in two ready-to-assemble kits; the HF SPORT 5000 (2.5m x 5m), or the HF SPORT 6000 (6m x 3m). Both are available in a wall depth of either 1.2m or 1.5m.

# L

### LUXURIOUS

Bring all the benefits of the gym to your doorstep with your own personal aquatic workout facility.

# E

### ECOLOGICAL

HF Sport pools are designed with the same award winning, recycled insulation featured in our standard pools.

# V

### VERSATILE

They are suitable for both in-ground or above-ground installation, indoors or outdoors.

# E

### EFFICIENT

The electricity consumption of a HF Swim Jet is considerably less than other leading products on the market.

# R

### ROBUST

The composite build technology used in the pool walls is tough and guaranteed to last.

### MAXIMISED SWIMMING AREA

Above-ground pool with recess.

Above-ground pool without recess.

Unique to Heat Form, there is a discrete recess for the jet system to sit in which does not encroach on the main swimming area.

The unobtrusive recess and cover screen come as standard with the HF Swim Jet Hidden version

## The HF Swim Jet

The HF Swim Jet is a discrete, powerful stream jet which promotes a natural swimming experience.

By utilising a stream jet, rather than the jet systems found in swim spas, the water flow mimics a river current which assists in all levels of swimming and stroke technique. It has can be set at variable speeds.

Due to its advanced technical design, the HF Swim Jet runs on a simple 25amp electrical supply, whilst still producing the power to the motor. This opens up the opportunity to install a HF Sport pool in any domestic location.

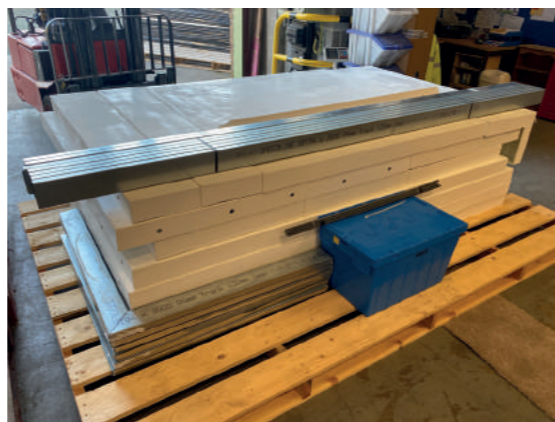

This energy efficient design will keep your running costs low and delivers an impressive maximum swim pace.

## What's included in a HF Sport Kit?
